                                                        Lithuania, Poland, France, It~
## 10 The Stig-Helmer Story
                                  2011 Comedy, Drama Lithuania, Poland, France, It~
## # ... with 12.177 more rows
```

year und Title sind nur zusammen eindeutig

Tibble modifizieren (2)

leider gibt es Duplikate:

```
data %>%
  count(Title, year)%>%
  filter(n>1)
```

```
## # A tibble: 150 x 3
     Title
                                           year
     <chr>
                                          <int> <int>
## 1 A Bride for Rip Van Winkle
                                           2016
## 2 A Love So Beautiful
                                           2017
## 3 A Perfect Day
                                           2016
## 4 About Time
                                           2013
## 5 Aftermath
                                           2017
## 6 Aliens
                                           1986
## 7 Alone
                                           2008
## 8 Anastasia
                                           1997
                                                    2
  9 Anohana: The Flower We Saw That Day
                                           2011
## 10 Another
                                           2012
## # ... with 140 more rows
